25X1

In a telephone conversation between [Redacted] of May 21st we were requested to ship some special, small springs for the Tracking Camera to Detachment C. This shipment was made on May 23rd, 1957. The shipment consisted of the following:

25X1

<u>Quantity</u>	<u>Part Number</u>	<u>Title</u>
5	151-1068	Spring, ratchet stop.
5	151-1069	Spring, sprocket catch.
5	151-1205	Spring, ratchet stop.
5	151-1209	Spring, stop.

Since the need of these springs is immediate and we found it necessary to purchase them on the outside, we charged these against that item on contract SC 21-54 providing for the spares. As you can appreciate, when we go through the necessary paper work for a quotation on these parts and establish our price this will result in one of the items of a forthcoming amendment.

As far as additional quantities of springs is concerned it is Don's intention to suggest that a certain quantity be included in each FAK, as a change to the FAK. At the same time Don intends to review the FAK and recommend changes for bringing it up to date in light of our knowledge. These changes we hope to be able to accomplish on the T & M contract SC 36-42 when approval is secured. We are making no changes on the FAK or performing any work until we have furnished you with a recommendation and price.

Don
